Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 28 September 2005.
- 2a) This action is FINAL. 2b) This action is non-final.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Claims 1-16 in the reply filed on 28 September 2005 is acknowledged. Cancellation of the non-elected claims is required.

Specification

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Objections

Claims 1-16 are objected to because of the following informalities: The claims, like the specification, are poorly translated into English making them difficult to understand what exactly is being claimed. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al. US Patent No. 6,077,310.

In reference to claim 1, Yamamoto teaches determining a zone enclosing a hole on a mask, the zone containing a plurality of cells (Figure 12A), selecting the cells adjacent to an edge of the hole in the zone to be corrected and determining the correction lengths based on the diffraction result of the hole and cells in the zone and correcting all of the edges of the hole (Column 7, lines 28-65).

In reference to claim 2 and 12, Yamamoto teaches wherein the zone is a collection of a bank of cells around holes and each is a closed loop and that the zone is a proper size (Figure 12A, column 12, lines 6-26)

In reference to claim 3, Yamamoto teaches wherein each bank has the same number of cells (Figure 12A).

In reference to claims 4-7, Yamamoto teaches wherein the diffraction of the template is determined by either rule or model based OPC (column 1, lines 39-46).

In reference to claims 8-9, Yamamoto teaches wherein the edges are lateral sides of the hole (Figure 4).

In reference to claim 10, Yamamoto shows padding corners (Figure 12B).

In reference to claim 11, Yamamoto shows cells enclosing the two outer edges of the corner (Figure 12B).

In reference to claim 12, Yamamoto teaches that the zone size is based on the critical dimensions and wavelength (column 6, line 62 – column 7, line 65).

In reference to claims 13-16, Yamamoto teaches wherein the elements are repeating patterns such as arrays or memory elements (Figures 12A-B).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brandon W. Bowers whose telephone number is (571)272-1888. The examiner can normally be reached on 8:30 am until 5:00 pm Monday through Friday.
